B-EV4

APPLICATIONS

With its remarkable versatility, as well as supreme reliability and ease of use, the B-EV4 range is trusted worldwide in a diverse range of sectors.

- Office administration
- Warehousing & logistics
- Couriers & transportation
- Airports & railways
- Postal services & depots
- ▶ Retail stores & supermarkets
- ▶ Hospitality & leisure ticketing
- ▶ Cinemas, theatres & museums
- Amusement parks
- Sports centres
- Hospitals & surgeries
- ▶ Laboratories & pharmaceuticals

> LABELS & TICKETS ON DEMAND FROM YOUR DESKTOP

The B-EV4 series utilises the most advanced technology in its construction, connectivity and usability, making it a perfect printing solution. Trust Toshiba.

A wide range of options, including an external media stand

An optional power supply tray for retail installations

COMPACT & CONVENIENT

Developed to fit into limited work spaces in many industries and applications, the B-EV4 is ready whenever it's required.

Using the latest 32-bit Toshiba processing technology, it gives rapid on-demand printing at speeds of up to 5 inches a second.

> TAKE CONTROL

Design and print straight from a PC using Windows® drivers and free Bartender Ultralite software. Print tickets and labels from 25.4mm up to a market-leading 995mm.

> FLEXIBLE MODELS

The direct thermal model (B-EV4D) is suitable for short-term ticketing and labelling using thermal papers whereas the B-EV4T also uses thermal ribbons for more hard-wearing items. Both types have a choice of print resolution, 203dpi for everyday uses or 300dpi for specialist barcodes and graphics.

> DESIGNED TO **PERFORM**

Precision engineered, this 108mm (4.25") thermal printer has a robust double-walled plastic cover to protect the inside against dust and external damage, giving you perfect results every time.

With easy access to the printhead, paper path and sensors, paper or label rolls are loaded with ease, and the spring-loaded media holder automatically centres the paper.

> UNIVERSAL COMPATIBILITY

Alongside the latest high speed 12Mbps USB and 10/100Mbps LAN interfaces, serial and parallel connections allow the B-EV4 range of printers to simply slot into existing legacy systems without software or driver changes.

Whether replacing a Toshiba printer using TPCL, or any make using BCI (Basic Command Interpreter), upgrading your printing technology has never been so easy.

> RIBBON RANGES

Approved Toshiba thermal transfer ribbons are relied on daily by businesses the world over to produce vital labelling for a huge variety of applications.

B-EV4 ribbons* are available in various grades and qualities to suit virtually any application in every market, from mass-produced short-term label printing up to highly specialised identification techniques using advanced resin products.
