Ultrapowerful WiFi 6

Lower latency | Faster speeds | Energy efficient | Longer range

RT-AX86S brings you all the benefits of WiFi 6 (802.11ax), and works perfectly with all your existing WiFi devices! **

Boost Your Mobile Gaming

Minimize lag and latency for mobile gaming with just a tap on the ASUS Router app.

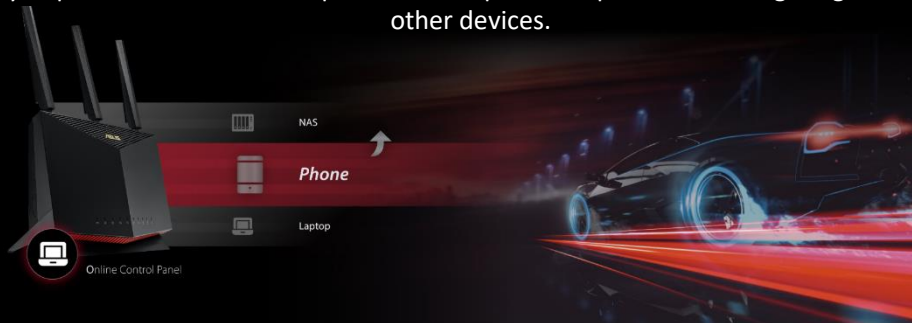

Gaming Without Limits **Prioritize via Gaming Port**

The dedicated gaming port on RT-AX86S automatically prioritizes any wired device connected to it. No complex configuration is needed, just connect your gaming PC or console to the special LAN port to give you a fast, stable connection that's always at the head of the queue.

Prioritize via Gear Accelerator

Gear Accelerator lets you prioritize devices wirelessly via RT-AX86S's online control panel. The simple interface lets you prioritize devices to help boost their speed and prevent them fighting over bandwidth with other devices.

Eliminate WiFi Congestion

Connect your devices to the 5 GHz band and avoid the often-congested 2.4 GHz band, while enjoying up to 5.6X faster WiFi speeds. Also, optional Dynamic Frequency Selection (DFS) unlocks up to 15 of the least-congested channels on the 5GHz band to give you even more bandwidth for gaming.***

Gaming Without Limits **Prioritize via Gaming Port**

RT-AX86S is designed to break down all the barriers that can slow down your gaming. It supports up to a 2 Gbps internet connection, so you can unlock the full potential of high-speed networking for both wired and WiFi connections.

Remove Network Bottlenecks

Adaptive QoS (Quality of Service) lets you keep your network running smoothly by prioritizing network traffic. You can prioritize applications such as streaming video or web surfing, as well as gaming. It's the perfect ally for delivering low-latency WiFi anywhere in your home.

Whole-Home Gaming

Does your router leave you with WiFi dead spots? RT-AX86S supports ASUS AiMesh, a unique mesh-networking technology that creates a whole-home network using multiple ASUS routers. With easy central control and seamless roaming, even non-experts can set it up with any AiMesh-capable routers you own. Say goodbye to WiFi dead zones!

Commercial-grade Security for Your Home

Home network security is crucial when you have multiple connected devices, and even more so when there are devices without anti-virus capabilities such as IoT devices. RT-AX86S includes lifetime free AiProtection Pro, including the latest WPA3 security protocol and advanced Parental Controls. Every device is protected with RT-AX86S, and you can keep an eye on everything that's happening on your network via the handy mobile app.

-  AiProtection Pro
-  WPA3 Security Protocol
-  Advanced Parental Controls

Easy Management Via Mobile App

Traffic Analyzer

Graphical monitoring of real-time traffic.

Network Diagnostics

Pinpoint your network problems with just one tap.

Guest WiFi

The easy way to share your WiFi securely without difficult passwords.

Disclaimer:

* Actual data throughput and WiFi coverage will vary from network conditions and environmental factors, including the volume of network traffic, building material and construction, and network overhead, result in lower actual data throughput and wireless coverage.

** To benefit from WiFi 6 features, the WiFi client needs to be WiFi 6 capable.

*** The number of speed is calculated with data rate of 2.4 GHz band and of 5 GHz band, which are respectively 861 and 4804 Mbps. And the DFS channels may not be supported in some countries due to local regulations.
